Description

HP-20PP - Workshop Hydraulic Press - 20 Tonne
 The Metalmaster HP-20PP 20 tonne workshop press has a variety of uses, ideal for removing and installing bushes, ball joints, bearings, gears, pulleys etc. The HP-20PP also has the added feature of a sliding head which can be moved to the side allowing for those offset pressing jobs.

The 20 tonne hydraulic ram and pump unit are also easily removed for use on other pressing jobs outside your workshop such as straightening or bending. The press is supplied with a pressure gauge, two heavy duty pressing plates and is constructed from industrial grade C channel making it ideal for mechanics or the serious home workshop.

PDS-2B - Bush Driver Set

Enables you to remove and install bushings ranging from 10 - 42mm in diameter on cars, trucks, tractors, construction equipment, electric motors and many other components having bushings.

The aluminium construction won't wear the bushing or effect bushing tolerance, which is critical for efficient operation of the engine, transmission and hubs.
