Description

The VERTEX Anglock vice has a ductile steel body with hardened and ground movable steel jaw.

Features

- All surfaces are precision ground and the bed is flame hardened
 Spherical segment allows for all directional alignment
 When clamping, a downward pressure of 1kg is exerted by the movable jaw for every 2kg of clamping pressure, preventing the work piece
 from tilting
 Bearing thrust collar cuts friction and increases clamping pressure
 Swivel base is graduated to 360°
