BuildPro™   **1 YEAR WARRANTY**

Description

These five face precision machined Riser Blocks feature accurate bored holes in a diagonal pattern.

Use Riser Blocks individually, or stacked, to elevate a workpiece or clamp. Cross join the Blocks for use as a beam. Use the Blocks to mount a BuildPro® plate to the side or end of the table, or to join tables together.

NEW! Models T60120, T60125, and T60130 feature two slots at one end for adjustable positioning.

- The versatile, five-sided Riser Block functions as a heavy duty "building block" to elevate clamps and workpieces.
- Right Angle Brackets can be mounted to the Riser Blocks to hold stock at varying heights.
- Riser Block used to mount BuildPro® plate in vertical position.
- Table Mount C-Clamps can be mounted to the Riser Blocks for push down clamping for taller workpieces.

The very practical, modular design of the BuildPro® Table makes it easy to set-up and tear down for job at hand, big or small. Save time and money by holding, positioning and locating quickly and easily with a wide variety of BuildPro® clamps and accessories.
All BuildPro® Tables have 16mm thick steel plate with Ø16mm holes in a 50mm grid pattern. All tables, except BuildPro® MAX, have 40mm slots between plates.
