70-605 - Measuring Box set

Padded Presentation Box

Ex GST Inc GST \$90.00 \$99.00

ORDER CODE: Q605 Pieces (No.): 6

Description

This selection of measuring tools is manufactured on fully auto CNC machines to ensure a high accuracy and consistency across the set with all the marking being laser engraved for the highest precision. With black anodized coating, which offers enhanced corrosion protection to each product to guarantee a lifetime of trouble-free use.

We carefully selected this range to offer a multitude of applications such as the multi gauge which can be used to check bolt length/diameters, thread pitches along with marking angles & checking drill sizes. It also includes a hole gauge to be able to quickly & easily find the diameter of a hole. A professional centre gauge can be used in both wood & metal applications to find the centre line of round items. The rafter square and combination square is widely used to professional carpenters and DIY users. You could say this is the perfect set of measuring tools for use in just about any application that can take pride in the workshop or toolbox of any tradesman or enthusiast.
