Description

Manufactured in Taiwan

A heavy duty chisel morticer with a capacity of 25mm in soft wood, cast iron frame construction with a fabricated steel stand. A single handwheel controls both longitudinal and lateral table movement. This system prevents the table from "skewing", a common problem with other morticers. The material clamp accommodates different work piece widths, whilst a multi-position down-feed hand lever provides the correct leverage for comfortable use.

To make this morticer even better the gas strut that's mounted in the rear column helps provide a smooth downward travel of the headstock, which also allows headstock "parking" in any position. A large cast iron table with a tall rear fence, plus an easily set depth stop for repeat accuracy is fitted. This machine is well suited to the busy workshop and will provide years of accurate and trouble-free use.
