ORDER CODE:	W07723A
MODEL:	TMQD620125F
Type:	BuildPro Max Table & Nitrided Finish
Leg Frame Type:	Includes Legs
Table Top Size (mm):	2000 x 1250
Table Height with Stand (mm):	900
Table Side Height (mm):	~
Top Plate Thickness (mm):	16
Grid Pattern (mm):	50 x 50
Table Hole Diameter (mm):	Ø16
Table Slots (mm):	~
Table Load Capacity (kg):	3000
Nett Weight (kg):	491

BuildPro™

Description

BuildPro® Models

NEW REVERSIBLE SELF-LOCATING TABLE PLATES!

Get longer wear from your BuildPro® Table.

When the surface of your BuildPro® Table plates show signs of wear, turn them over to provide a new work surface. New, Patented Bushing design allows you to remove, re-position, re-align, and reverse the table plates!

The very practical, modular design of the BuildPro® Table makes it easy to set-up and tear down for job at hand, big or small. Save time and money by holding, positioning and locating quickly and easily with a wide variety of BuildPro® clamps and accessories.

In this economy, we know you need to be flexible and responsive to new business opportunities by reducing set-up time, improving consistency and work quality and remaining competitive in both pricing and delivery in a wide variety of jobs; short runs, volume production, prototypes, and multiple jobs in fabrication, repairs, and maintenance.

Accuracy:

Table flatness : 0.30mm / 914.4mm
 Hole diameter : 16mm + 0.05mm
 Hole spacing : 50mm ± 0.038mm
 Plate thickness : 16mm ± 0.10mm

All BuildPro® Max Tables have 16mm thick steel plate with Ø16mm holes in a 50mm grid pattern.

The New BuildPro MAX has a continuous plate tabletop surface with 33% more machined holes than the standard, slotted BuildPro Tables, for a maximized work surface.

Use the BuildPro MAX to: Set-up heavy duty, large, or complex fixtures, or set-up more than one fixture at a time. Utilize the additional holes for clamping at multiple points for greater fixturing accuracy.

Features

- The nitriding (heat-treating) process is a mechanical polish and post salt bath oxidative treatment. The benefits of this process included: Anti-Spatter, Corrosion Protection, and Resistance to wear, lubricity and fatigue strength
- Ø16mm holes
- 16mm thick plate
- 50 x 50mm grid pattern
