Graduated Scale (mm):	~
Resolution (deg):	0.1°

Description

This BD-360R digital bevel box with rotary encoder predominantly used on manual panbrakes & folders where an accurate digital reading is required. The unit can measure between 0-360° with a resolution of 0.1° and will automatically shut off after 5 minutes. The digital LCD screen is easy to read and can be simply located in a convenient position as it incorporates a magnetic base.

Features

- Mini digital box with encoder readings between 0-360°
- Magnets in the base for convenient mounting
- Auto shut off after 5 minutes
- Digital readout display
- On/Off & Zero button
- 0.1 degree resolution
- 900mm cable length
- Converts between ABS & relative modes

Includes

- Includes CR2032 batteries
